

lexEN v1 Three-Reviewer Agreement Report

Report date: 2026-06-13. This report audits 363 suspicious Maru2022 validation items reviewed independently by RF, PW, and PH. Maru2022 labels are source labels under review, not a privileged adjudication.

What This Report Includes

Fine WordNet agreement, Glite-coarsened agreement, pairwise coefficients, reviewer answer shape, Maru2022 label support, concentration by item type, cannot-answer evidence, and a full appendix for all reviewed items.

Headline Metrics

Metric	Value
Reviewed items	363
Fine all-three agreement	129 (35.5%)
Glite all-three agreement	229 (63.1%)
Fine Fleiss kappa	0.537
Glite Fleiss kappa	0.740

How To Read The Numbers

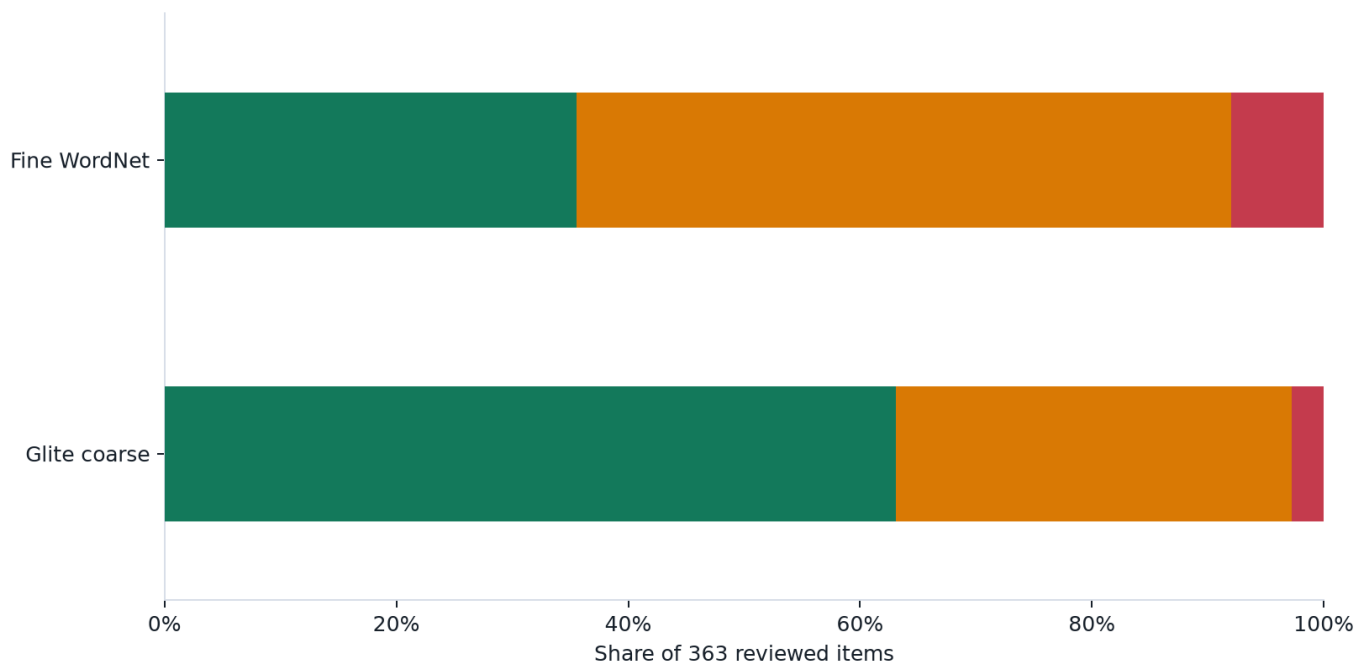

Fine WordNet agreement compares exact WordNet sense-key sets. Glite agreement first maps those sense keys to coarse Glite concepts. Maru2022 support counts how many reviewers selected the Maru2022 source label for an item.

Headline Agreement

Agreement Levels

Metric	Fine WordNet	Glite coarse
All three agree	129 (35.5%)	229 (63.1%)
Exactly two agree	205 (56.5%)	124 (34.2%)
All three disagree	29 (8.0%)	10 (2.8%)
All three agree and match Maru2022	40 (11.0%)	196 (54.0%)
Exactly two agree and match Maru2022	56 (15.4%)	54 (14.9%)
Fleiss kappa	0.537	0.740

Agreement levels

Visual summary only; exact counts are in the table above. Colors from left to right: all three agree, exactly two agree, all three disagree.

Agreement Pattern Relative To Maru2022

Pattern	Fine WordNet	Glite coarse
All three agree and match Maru2022	40 (11.0%)	196 (54.0%)
All three agree, different from Maru2022	89 (24.5%)	33 (9.1%)
Exactly two agree and match Maru2022	56 (15.4%)	54 (14.9%)
Exactly two agree, different from Maru2022	149 (41.0%)	70 (19.3%)
All three disagree	29 (8.0%)	10 (2.8%)

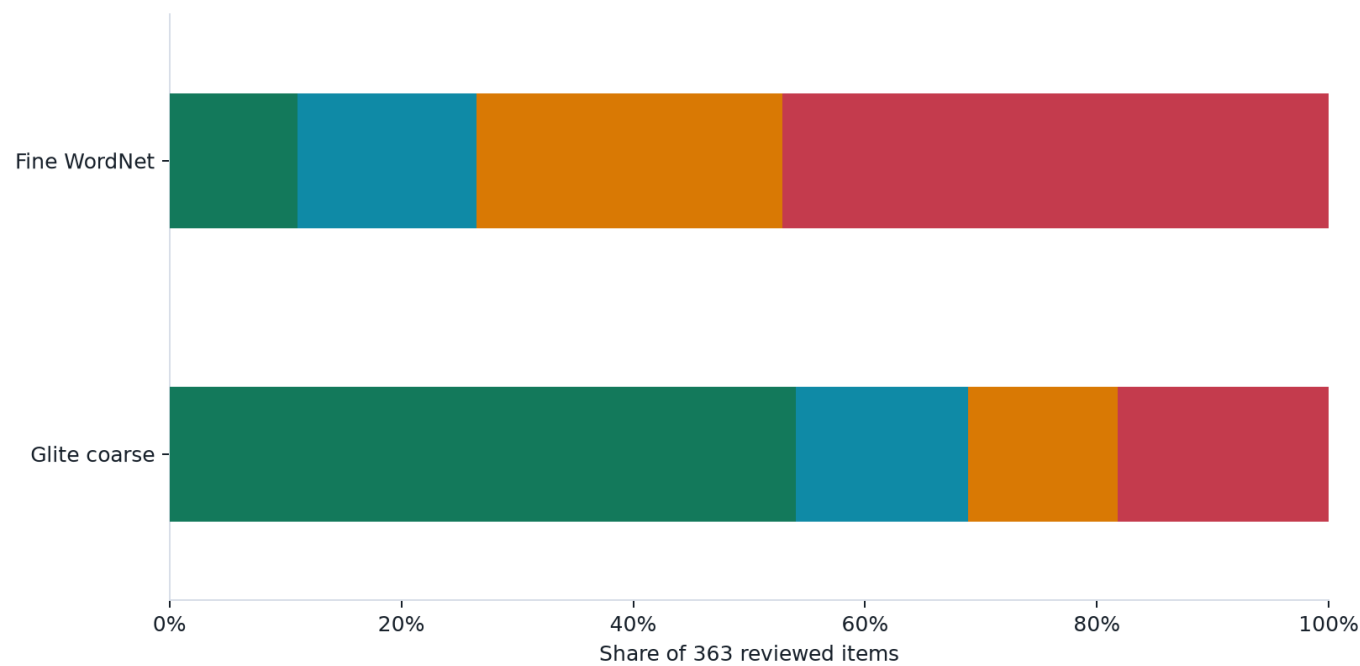

Maru2022 Label Support Split

Reviewer Support For The Maru2022 Label

Support	Fine WordNet	Glite coarse
3/3 reviewers selected the Maru2022 label	40 (11.0%)	196 (54.0%)

Support	Fine WordNet	Glite coarse
1/3 reviewers selected the Maru2022 label	96 (26.4%)	47 (12.9%)
0/3 reviewers selected the Maru2022 label	171 (47.1%)	66 (18.2%)

Maru2022 label support

Visual summary only; exact counts are in the support table above. Colors from left to right: 3/3, 2/3, 1/3, and 0/3 reviewers selected the Maru2022 label.

Pairwise Agreement

Each 3x3 matrix cell compares the row reviewer with the column reviewer. Raw agreement cells show the percentage and matching-item count. Diagonal cells are self-comparisons included only to keep the reviewer grid explicit.

Agreement by POS and source

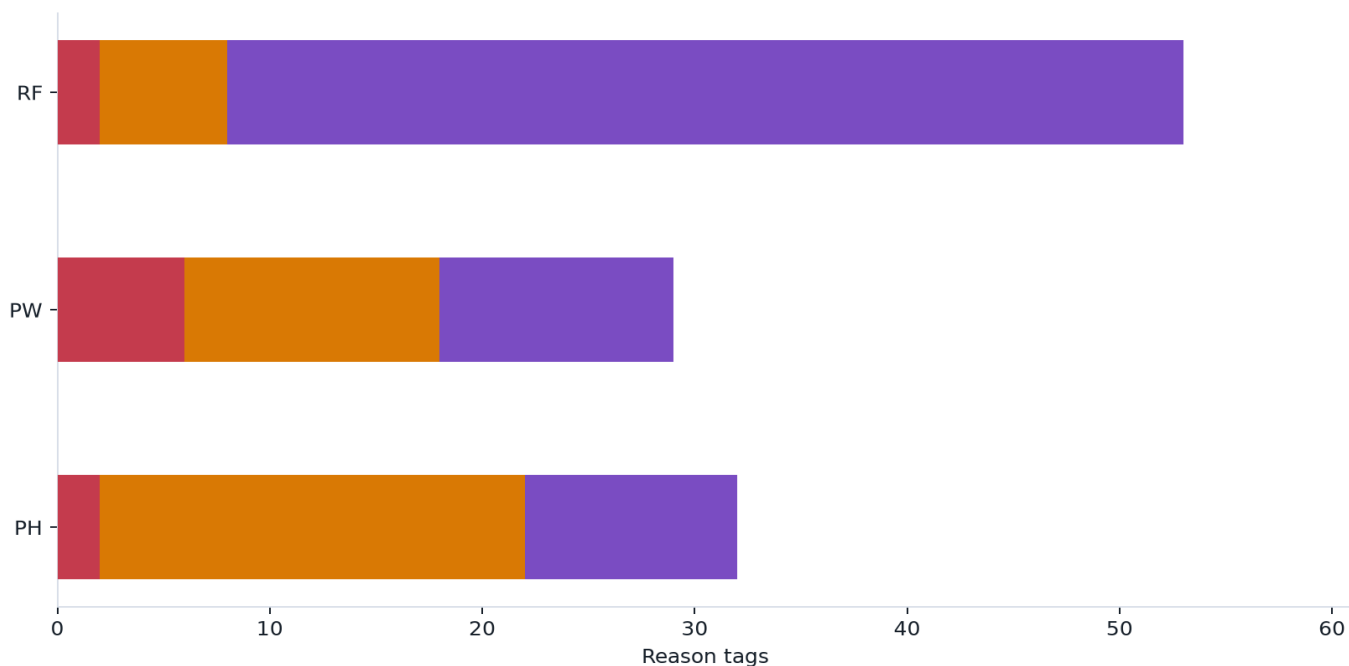

Visual summary only; exact counts are in the POS and source tables above. Blue bars are Fine WordNet; green bars are Glite coarse.

Cannot-Answer Reasons

At least one reviewer marked 77 items unanswerable; all three reviewers marked 5 items unanswerable.

Reason	RF	PW	PH
input defective	2	6	2
inventory inadequate	6	12	20
no sense applies	45	11	10

Cannot-answer reasons

Visual summary only; exact counts are in the tables in this section. Colors from left to right: input defective, inventory inadequate, no sense applies.

Cannot-Answer Consensus

Consensus strength	Items
Exactly one reviewer marked cannot answer	50 (13.8%)
Exactly two reviewers marked cannot answer	22 (6.1%)
All three reviewers marked cannot answer	5 (1.4%)
At least two reviewers marked cannot answer	27 (7.4%)

The strongest unusable-item signal is the at-least-two-reviewer subset: 27 items have at least two independent cannot-answer judgements. This includes 22 exactly-two cases and 5 all-three cases. These are not ordinary sense disagreements; they indicate that the item, context, or available WordNet inventory did not support a reliable fine-grained answer.

At-Least-Two Cannot-Answer Reasons

Reason present in at-least-two subset	Items
input defective	6 (1.7%)
inventory inadequate	18 (5.0%)
no sense applies	24 (6.6%)

Input-defective tags identify cases where the sentence, tokenization, target span, or source material prevents a reliable WSD judgement. The table below is split by how many reviewers used the input-defective reason; it is not limited to unanimous cases.

Removed Reviewed Items

lexEN v1 removes reviewed suspicious items when the review evidence does not provide a usable two-reviewer fine-grained sense label. No Maru2022 fallback label is used for these cases in the benchmark exports.

Removal Policy Applied To Reviewed Items

Removal evidence	Items	Benchmark action
Two or three reviewers marked cannot answer	27	Removed from lexEN benchmark
No fine-grained sense received two-reviewer support	29	Removed from lexEN benchmark
Total reviewed items removed	56	No Maru2022 fallback label is used

The 29 no-consensus items are removed because all three reviewers selected different fine-grained answers. Coarse Glite agreement is reported for audit, but lexEN v1 is a fine-grained WordNet benchmark, so coarse agreement is not enough to keep a scorable item.

Manual Sample Review

Item	Lemma/POS/source	Recommendation	Rationale
semeval2013.d000.s019.t000	game / NOUN / semeval2013	Remove	WordNet lacks the figurative strategic-manoeuving sense of game in this context.
semeval2013.d009.s022.t000	conservative / NOUN / semeval2013	Remove	The US ideological conservative reading is not cleanly captured by the party/member senses.
semeval2015.d001.s009.t007	input / NOUN / semeval2015	Remove or adjudicate	The computer-input sense is missing or underspecified, and Maru2022 support is weak.
semeval2015.d002.s011.t008	organisation / NOUN / semeval2015	Remove or adjudicate	The context likely means the way work is organised, while the available labels diverge.
semeval2015.d003.s009.t014	follow / VERB / semeval2015	Remove from fine scoring	The reviewers differ at fine WordNet level even though Glite coarsening makes them agree.
semeval2015.d003.s012.t002	act / VERB / semeval2015	Remove	The functional/location use of act in the central nervous system does not map cleanly.
senseval2.d001.s015.t001	make / VERB / senseval2	Remove	The gene-copy context for make proteins lacks a clean production sense in the inventory.
senseval2.d001.s026.t007	fundamental / ADJ / senseval2	Remove from fine scoring	The fine-grained distinction is underdetermined even though coarse meaning is closer.
senseval2.d001.s041.t005	specific / ADJ / senseval2	Remove	Specific genes means particular or individual genes, and reviewers did not converge.
senseval2.d001.s057.t002	attention / NOUN / senseval2	Remove	Turned his attention to is a fixed research-focus use, not a reliable fine sense.
senseval2.d002.s004.t002	dominate / VERB / senseval2	Remove or adjudicate	Dominate means strongly influence or prevail over, but the inventory split is unstable.
senseval2.d002.s055.t001	involvement / NOUN / senseval2	Remove or adjudicate	The intended involvement reading mixes participation and control, producing ambiguity.
senseval3.d000.s002.t001	ready / ADJ / senseval3	Remove	Ready answer means prompt or available answer; the inventory does not fit cleanly.
senseval3.d000.s011.t004	occasion / NOUN / senseval3	Remove or adjudicate	All three choices are plausible but different, and Maru2022 has no support.
senseval3.d000.s021.t003	time / NOUN / senseval3	Remove	At the time is a fixed expression and does not support reliable fine-grained tagging.
senseval3.d000.s031.t002	realize / VERB / senseval3	Remove or adjudicate	The become-aware nuance exposes a WordNet definition boundary problem.
senseval3.d000.s116.t001	encourage / VERB / senseval3	Remove	Encourage his company means make more likely or promote, not a clean available sense.
senseval3.d001.s045.t002	reveal / VERB / senseval3	Remove	Investigation reveals mixes make-known and show evidence; WordNet is too narrow here.
senseval3.d002.s086.t000	thing / NOUN / senseval3	Remove	Things got rougher uses thing as a general situation marker, not a clean WordNet sense.
senseval3.d002.s138.t000	quiet / ADJ / senseval3	Remove from fine scoring	Quiet has noise versus activity ambiguity; reviewers agree only after Glite coarsening.

What The Agreement Shows

Unanimous and two-reviewer fine-grained agreements provide direct evidence for correcting Maru2022 labels. Two-reviewer cannot-answer cases and cases with no fine-grained majority are excluded from the benchmark release, but remain visible here for downstream audit.

Technical Method

The report is generated by scripts/build_agreement_report.py from the RF/PW/PH review JSON files, the selection source package, and the Glite mapping files. It writes Markdown, HTML, PDF, metrics JSON, per-item JSONL, and images under reports/rf-pw-ph-2026-06-13/.

Lemma/POS/source: proportion / NOUN / semeval2013 (semeval2013.d011)

Context: And does so without taking into account the fact that the diversity contributed by immigrants contributes to the creation of ideas and to economic growth (a large [proportion] of naturalised immigrants are among American Nobel prize winners, whilst Google, Intel, Paypal, eBay and Yahoo were all founded by immigrants).

Maru2022 label

- proportion%1:24:01:: (proportion.n.04) - the relation between things (or parts of things) with respect to their comparative quantity, magnitude, or degree

Examples: an inordinate proportion of the book is given over to quotations | a dry martini has a large proportion of gin

Comment: Sense 1 is also a good fit, but this use of "proportion" is not really concerned with the exact number (quotient) of American Nobel prize winners who are immigrants. It's simply saying that they represent a significant subset of the whole. Sense 4 is more in line with this sense.

Comment: Sense 2 seems to be more about justification or reasoning behind decisions. I did hesitate about sense 1 because it only seems to define the countable sense, whereas the text demonstrates the uncountable use of 'policy'. Most dictionaries would give the same definition as here, but give the label (C, U) to cover both uses.

Robert Farren (RF)

- Cannot answer: no sense applies

Note: The stative sense "to be smiling, to have a smile on one's face" is missing. Sense 1 specifies "change one's facial expression..." etc., so it's not stative. This usage in this particular sentence, "smiling a smile", obviously contains a redundancy, but it appears to underlyingly be about the stative sense that I've just described. Probably with an additional suggestion of intentionality.

Patrick White (PW)

Note: tautologous usage for stylistic effect. Neither of the WordNet senses allows for the noun "smile" as the object of the verb "smile"

Penny Hands (PH)

- Cannot answer: inventory inadequate

Note: Sense 1 seems to be about the intransitive sense of 'smile'. Sense 2 is very close because it covers the transitive sense of 'smile'. However, you don't 'express *a smile* with a smile' so it doesn't quite fit. This use should be defined as 'to give a smile of a particular type'.

Note: "The world of football" is a particular milieu, like the "world of finance", etc. The term doesn't refer only to people, but to organizations, clubs that are run like businesses, a system, a complex body of rules and conventions. There's no sense given here that comes close to this.

Penny Hands (PH)

- world%1:14:01:: (world.n.02) - people in general; especially a distinctive group of people with some shared interest Examples: the Western world

Comment: I opted for sense 2 because the world of football does refer to a group of people with a shared interest. However, the example at sense 2 ('the Western world') muddies the waters – it should be at sense 6, which refers to 'a part of the earth that can be considered separately'. The sense 6 example, 'the world of insects', mirrors 'the world of football', which caused me to hover over sense 6; however, the definition at sense 6 doesn't work at all for 'the world of football'. It would be better if the sense 2 definition were reworded as 'the people or things belonging to a particular group or connected with a particular interest'. Then 'the world of insects' and 'the world of football' would be examples for that sense.

Comment: I've chosen a single sense (sense 1), but really the intended meaning is not just the meaning of "rules", but that of the collocation "unwritten rules". If I considered "rules" strictly in isolation, totally ignoring the collocation and therefore the word's meaning in the sentence, then sense 8 would have been the best match.

Comment: This is a case where the input is arguably defective. Seen in context, the sentence seems to be referring to the geographical area for which CONCACAF, one of FIFA's continental governing bodies, is responsible. If so, then sense 1 is the best choice. If not, then this sense of "area" is like "field of activity", which is a figurative sense not represented here.

Comment: I've picked sense 1 because it's close enough; however, 'the fact that ...' is a phrase that is used to refer to a particular situation that exists, and ideally, the inventory would include that as a sense in its own right. It's not the same as when you say 'Collect all the facts' (i.e. things that are true and can be proved); rather it's a way of talking about a situation.

Sense 1 is more about general domestic comfort (having nice furniture or luxury household items) rather than finding something comforting because it stops you from being anxious, like a child's dummy, a teddy bear or a computer screen (sense 2). I rejected sense 3, even though it's in the right ballpark semantically, because it talks about an 'act' of consoling, whereas in the text, residents were seeking a 'feeling'.

Sense 3 is also possible, but I don't think the tremor is repeatedly moving the author up and down – I think what is being described is a single bounce (sense 2). Note: This phrase is a very non-literal translation of an utterance by Nicolas Sarkozy. The word "points" was added in translation and doesn't correspond to anything in the original French. It's not entirely clear what it refers to, though the phrase "points de croissance" ("growth areas") translates literally as "growth points", so that's a candidate. However, "percentage points", and "areas" in the sense of "localities" are also fairly plausible.

F4. semeval2013.d009.s022.t000

Lemma/POS/source: conservative / NOUN / semeval2013 (semeval2013.d009)

Context: Moreover, [conservatives] argue that it's Justice Elena Kagan who has an ethical issue, not Scalia and Thomas.

Maru2022 label

- conservative%1:18:01:: (conservative.n.02) - a member of a Conservative Party

Robert Farren (RF)

- Cannot answer: no sense applies

Note: Although this very American sense of "conservatives" is political, it does not imply membership of a political party, but rather, "ideological allegiance to right-wing values" generally (and moreover these right-wing values are not necessarily very conservative or Conservative).

Patrick White (PW)

- conservative%1:18:00:: (conservative.n.01) - a person who is reluctant to accept changes and new ideas

Penny Hands (PH)

- conservative%1:18:01:: (conservative.n.02) - a member of a Conservative Party

Comment: Even though there is no 'Conservative Party' (see sense 2) per se in the US, I am taking this definition to refer to right-leaning political parties in general, and this text is clearly about politics.

Context: If we want to understand how it works, the best thing we can do is to realize that our [input] is being converted into MathML although it is not necessary to know MathML.

Maru2022 label

- input%1:06:00:: (input.n.04) - a component of production; something that goes into the production of output

Robert Farren (RF)

- input%1:06:00:: (input.n.04) - a component of production; something that goes into the production of output

Patrick White (PW)

- Cannot answer: no sense applies

Note: Sense is entering of information into a computer

Penny Hands (PH)

- input%1:10:00:: (input_signal.n.01) - signal going into an electronic system

Comment: I rejected sense 4 because that seems to be more about producing something physical, while sense 1 relates specifically to electronic systems.

Maru2022 label

- organisation%1:14:00:: (organization.n.01) - a group of people who work together

- organisation%1:14:01:: (administration.n.02) - the persons (or committees or departments etc.) who make up a body for the purpose of administering something Examples: he claims that the present administration is corrupt | the governance of an association is responsible to its members

Robert Farren (RF)

- organisation%1:14:01:: (administration.n.02) - the persons (or committees or departments etc.) who make up a body for the purpose of administering something Examples: he claims that the present administration is corrupt | the governance of an association is responsible to its members

Penny Hands (PH)

- organisation%1:04:01:: (organization.n.06) - the activity or result of distributing or disposing persons or things properly or methodically Examples: his organization of the work force was very efficient

Comment: The sentence is not very well written, but I think it's trying to say 'the way work is organised'.

F7. semeval2015.d003.s009.t014

Lemma/POS/source: follow / VERB / semeval2015 (semeval2015.d003)

Context: In combination with supportive measures such as other veterinary treatment or a special diet, Cerenia can also be used in the treatment of vomiting (either as injection or as injection [followed] by tablets).

Maru2022 label

- follow%2:42:03:: (follow.v.10) - to bring something about at a later time than Examples: She followed dinner with a brandy | He followed his lecture with a question and answer period

Robert Farren (RF)

- follow%2:42:03:: (follow.v.10) - to bring something about at a later time than Examples: She followed dinner with a brandy | He followed his lecture with a question and answer period

Patrick White (PW)

- follow%2:42:01:: (follow.v.06) - come after in time, as a result Examples: A terrible tsunami followed the earthquake

Penny Hands (PH)

- follow%2:42:00:: (postdate.v.01) - be later in time Examples: Tuesday always follows Monday

Comment: '... an injection followed by tablets' is a passive construction which can be rephrased as 'tablets follow an injection' (just as Wednesday follows Tuesday). There is no human agent involved. This means it can't be sense 10 because it would have to be 'She/he follows the injections with tablets.' It isn't sense 6 either because the tablets do not come as a result of the injection.

F8. semeval2015.d003.s012.t002

Lemma/POS/source: act / VERB / semeval2015 (semeval2015.d003)

Context: Cerenia blocks a neurokinin 1 (NK1) receptor, which [acts] in the central nervous system.

Maru2022 label

- act%2:41:00:: (act.v.01) - perform an action, or work out or perform (an action) Examples: think before you act | We must move quickly

Robert Farren (RF)

- Cannot answer: no sense applies

Note: This sense of "act" can't be defined in isolation, it's really "act in the central nervous system": the location of the act is what matters, more than what the event is or what exactly the receptor does. It "has its role, its function, its purpose" in the central nervous system. Something "happens" in the central nervous system.

Patrick White (PW)

- act%2:41:06:: (work.v.03) - have an effect or outcome; often the one desired or expected Examples: The voting process doesn't work as well as people thought | How does your idea work in practice?

Context: When functioning normally, they [make] proteins that hold a cell's growth in check.

Maru2022 label

- make%2:36:08:: (cause.v.01) - give rise to; cause to happen or occur, not always intentionally Examples: cause a commotion | make a stir

Robert Farren (RF)

- make%2:36:00:: (make.v.03) - make or cause to be or to become Examples: make a mess in one's office | create a furor

Patrick White (PW)

- make%2:36:01:: (produce.v.02) - create or manufacture a man-made product Examples: We produce more cars than we can sell | The company has been making toys for two centuries
Comment: Although the thing produced is not man-made, this sense seems the best.

Penny Hands (PH)

- Cannot answer: inventory inadequate
Note: Definitions 3 and 5 are reasonably close, but the examples are all abstract, not physical entities that are produced. Sense 6 would have worked if it hadn't specified 'as part of a man-made process'. The inventory is lacking the basic sense of 'make', which is 'create or produce something as a result of a process.'

F10. senseval2.d001.s013.t004

Lemma/POS/source: believe / VERB / senseval2 (senseval2.d001)

Context: In recent months, researchers have come to [believe] the two types of cancer genes work in concert: An oncogene may turn proliferating cells malignant only after the tumor-suppressor gene has been damaged.

Maru2022 label

- believe%2:31:03:: (believe.v.03) - be confident about something Examples: I believe that he will come back from the war

Robert Farren (RF)

- Cannot answer: no sense applies
Note: This sense of "believe", in a context involving researchers, can be described as "consider to be true, on the balance of probabilities and based on evidence and reason, a hypothesis that is not yet proven to be true". Obviously close to sense 1, but much more specific.

Patrick White (PW)

- believe%2:31:04:: (think.v.01) - judge or regard; look upon; judge Examples: I think he is very smart | I believe her to be very smart

Penny Hands (PH)

- believe%2:31:00:: (believe.v.01) - accept as true; take to be true Examples: I believed his report | We didn't believe his stories from the War
Comment: I chose sense 1 because researchers now accept this to be true, based on evidence. Sense 2 seems to be more about saying what you think someone is like. Sense 3 seems to be more about trusting in fate.

Agreement

Maru2022 label

- fundamental%5:00:00:important:00 (cardinal.s.01) - serving as an essential component Examples: a cardinal rule | the central cause of the problem
- fundamental%5:00:00:significant:00 (fundamental.s.03) - far-reaching and thoroughgoing in effect especially on the nature of something Examples: the fundamental revolution in human values that has occurred | the book underwent fundamental changes

Robert Farren (RF)

- fundamental%5:00:00:significant:00 (fundamental.s.03) - far-reaching and thoroughgoing in effect especially on the nature of something Examples: the fundamental revolution in human values that has occurred | the book underwent fundamental changes
Comment: Both senses fit perfectly, and the context doesn't clarify which one is the intended meaning.

Patrick White (PW)

- fundamental%5:00:00:significant:00 (fundamental.s.03) - far-reaching and thoroughgoing in effect especially on the nature of something Examples: the fundamental revolution in human values that has occurred | the book underwent fundamental changes

Penny Hands (PH)

- fundamental%5:00:00:basic:00 (fundamental.s.02) - being or involving basic facts or principles Examples: the fundamental laws of the universe | a fundamental incompatibility between them
Comment: It is tempting to also select sense 3, but I think I would be inferring too much from the text. Yes, basic/core/underlying insights often have far-reaching effects, but the text is not explicitly talking about fundamental changes or shifts.

Patrick White (PW)

- attention%1:09:01:: (attention.n.05) - the faculty or power of mental concentration Examples: keeping track of all the details requires your complete attention

Maru2022 label

Note: This sense of "thought", in a research context, can be described as "believed, based on evidence and reason, but not yet proven".

Patrick White (PW)

- think%2:31:03:: (think.v.02) - expect, believe, or suppose Examples: I imagine she earned a lot of money with her new novel | I thought to find her in a bad state

Penny Hands (PH)

- think%2:31:01:: (think.v.01) - judge or regard; look upon; judge Examples: I think he is very smart | I believe her to be very smart

F16. senseval2.d002.s003.t007

Lemma/POS/source: metaphysical / ADJ / senseval2 (senseval2.d002)

Context: And the reason we do not want to is that effective education would require us to relinquish some cherished [metaphysical] beliefs about human nature in general and the human nature of young people in particular, well as to violate some cherished vested interests.

Maru2022 label

- metaphysical%5:00:00:theoretical:00 (metaphysical.s.02) - highly abstract and overly theoretical Examples: metaphysical reasoning

Robert Farren (RF)

- Cannot answer: no sense applies

Note: This sense of "metaphysical" is approximately opposite in meaning to "empirical, concrete, observable, demonstrable". It has connotations of not being rooted in observable everyday reality.

Patrick White (PW)

- metaphysical%3:01:00:: (metaphysical.a.01) - pertaining to or of the nature of metaphysics Examples: metaphysical philosophy

Note: Sense is "be the most important/noticeable part of something". Close to sense 1.

Penny Hands (PH)

- dominate%2:42:01:: (dominate.v.02) - be in control Examples: Her husband completely dominates her

Comment: I opted for sense 2 because according to the text, these beliefs strongly influence (i.e. dominate) the educational establishment, and 'control' and 'strongly influence' are similar in meaning,

Context: -- ``Community [involvement] ``is an even worse idea.

Maru2022 label

- involvement%1:26:01:: (participation.n.02) - the condition of sharing in common with others (as fellows or partners etc.)

Robert Farren (RF)

- Cannot answer: inventory inadequate

Note: This sense of "involvement" includes the idea of participating, not only in an activity, but also in control or decision-making. It's about sharing power, having a say in how things are done, as well as taking an active part in doing them. So it's close to sense 5 above, but more specific.

Patrick White (PW)

- involvement%1:04:00:: (engagement.n.07) - the act of sharing in the activities of a group Examples: the teacher tried to increase his students' engagement in class activities

Penny Hands (PH)

- involvement%1:26:01:: (participation.n.02) - the condition of sharing in common with others (as fellows or partners etc.)

Comment: This one is more about the relationship between the school and the community, e.g. local politicians having an influence over policy decisions (sense 5). It is not about the community's active participation in the children's learning (which would be sense 1).

Context: He had no [ready] answer, as much from surprise as from the fit of coughing.

Maru2022 label

- ready%3:00:00:: (ready.a.01) - completely prepared or in condition for immediate action or use or progress Examples: get ready | she is ready to resign

Robert Farren (RF)

- ready%5:00:01:available:00 (ready.s.01) - (of especially money) immediately available Examples: he seems to have ample ready money | a ready source of cash

Comment: This attributive sense of "ready" seems quite distinct from the more common predicative senses (like sense 1 above). It corresponds closely to this, from the Concise Oxford: "immediate, quick, or prompt". Sense 2 is close.

Patrick White (PW)

- ready%5:00:00:prepared:00 (ready.s.03) - made suitable and available for immediate use Examples: dinner is ready

Penny Hands (PH)

- Cannot answer: inventory inadequate

Note: While sense 5 was the most obvious choice, the definition describes someone's mind rather than something they might say. Sense 2 works better from the point of view of having something clever ready to say, and I would have opted for that if the definition were worded differently, perhaps as: 'available to be used easily and immediately', without the mention of 'especially money'. Examples might be 'a ready supply', 'a ready answer' and 'ready cash'.

Robert Farren (RF)

- occasion%1:16:00:: (occasion.n.03) - reason Examples: there was no occasion for complaint

Patrick White (PW)

- occasion%1:11:00:: (juncture.n.01) - an event that occurs at a critical time Examples: at such junctures he always had an impulse to leave | it was needed only on special occasions

Penny Hands (PH)

- occasion%1:28:00:: (occasion.n.04) - the time of a particular event Examples: on the occasion of his 60th birthday

Comment: The example at sense 4 is distracting because it mentions a special occasion (60th birthday), which is sense 1. If you read sense 4 without its example, it works perfectly well for the use we have in the text – a particular time when something happens. (I was close to opting for 'Inventory is inadequate', but in the end, went with the sense 4 definition and tried to ignore the example.)

Penny Hands (PH)

- time%1:28:00:: (time.n.03) - an indefinite period (usually marked by specific attributes or activities) Examples: he waited a long time | the time of year for planting

Penny Hands (PH)

- encourage%2:41:00:: (promote.v.01) - contribute to the progress or growth of Examples: I am promoting the use of computers in the classroom

Comment: Senses 2 and 3 refer to situations where someone lacks something such as success or confidence, and needs someone or something to push them to do it. In the text, the author's companion isn't shy, and doesn't need to be coaxed or boosted with helpful encouragement. So I opted for sense 1, which seems to be talking about making something (in this case, Pete's company) more likely to develop.

- talk%2:32:03:: (speak.v.03) - use language Examples: the baby talks already | the prisoner won't speak

Comment: Sense 3 is the nearest fit, but it's not great. In this sentence "talk" seems to mean something like "talk to fill the silence, make small-talk".

Patrick White (PW)

- talk%2:32:01:: (talk.v.01) - exchange thoughts; talk with Examples: We often talk business | Actions talk louder than words

Penny Hands (PH)

- talk%2:32:00:: (talk.v.02) - express in speech Examples: She talks a lot of nonsense | This depressed patient does not verbalize

Comment: I rejected sense 1 because it suggests interaction. (There is none apparent in the text.) Sense 3 seems to refer to the ability or willingness to speak. Sense 2 (which I opted for) is about simply producing speech. One reservation I have about sense 2 is that the definition seems to suggest it only covers a transitive use – I would prefer 'express (oneself) in speech' – whereas in the text, 'talk' is intransitive. However, sense 2's second example is intransitive, so I went with it.

Note: Sense 2 is close but it is too restrictive. It would work better if it simply said 'make known to someone'

- thing%1:11:00:: (thing.n.05) - an event Examples: a funny thing happened on the way to the...

Comment: This one is more specific than the vague 'How are things?' or 'Things are a bit rough at the moment' usage because an event is now taking place.

Comment: Sense 8 seems to be about direct speech, i.e. a quote + a reporting verb (say). But there is no proof that he uttered this statement aloud; it could have been a written statement. That's why I also selected sense 1.

- quiet%3:00:02:: (quiet.a.01) - characterized by an absence or near absence of agitation or activity Examples: a quiet life | a quiet throng of onlookers
Comment: Both senses are equally plausible, and the extra context provided by preceding and following sentences doesn't clarify which sense is meant.

Patrick White (PW)

- quiet%3:00:02:: (quiet.a.01) - characterized by an absence or near absence of agitation or activity Examples: a quiet life | a quiet throng of onlookers

Penny Hands (PH)

- quiet%3:00:01:: (quiet.a.02) - free of noise or uproar; or making little if any sound Examples: a quiet audience at the concert | the room was dark and quiet
Comment: Sense 2 seems to be more about the absence of noise and gives the example of a place being quiet (the text is also talking about a place). Sense 1 is more about a lack of unrest, and doesn't mention sound at all.
